HO Scale GATX "Whalebelly" Hoppers - Both SAL & CB&Q Versions

George Speir Photo

CB&Q version also appropriate for **BN & DPCX**
SAL version also appropriate for **SCL & CSX**

QConnection, in cooperation with Wright Trak Railroad Models, is pleased to announce our first ever resin freight car kit, the GATX Pressure Slide Hoppers. These high-quality HO scale kits will be produced in two versions, CB&Q and SAL. The kits will be an undecorated, one piece cast resin body design with stainless steel photo etchings, trucks and Kadee® #58 couplers included. They will be of the same high quality that has been maintained by the tool makers of Wright Trak Railroad Models since 2001.

We are estimating the price of this kit to be in the \$50-\$60 range, but for those who make a \$10 per car reservation deposit by November 15th, the price will be 10% off the retail price per kit. As always, if there are insufficient reservations to justify the production of this kit, your deposits will be refunded.

We are working closely with Microscale Industries to add appropriate decals for these models to their product line.
